Summary

Design leader with 14 years of product design experience, spanning agency and brand work through B2B SaaS and enterprise software. I have led teams of four to five designers through platform growth, post-acquisition integration, and rapid iteration, while staying hands-on in research, interaction design, and systems work. My practice is AI-forward by default: I prototype in code, use AI tooling daily, and have shipped production AI features requiring real judgment about trust, transparency, and user control. I build lean process that holds up at speed and coach designers to raise their own bar.

Core Strengths

- Design team leadership: hiring, coaching, performance, and career development for teams of four to five
- Building lean standards and process: review cadence, critique, story mapping, structured user testing, design sign-off
- B2B SaaS and enterprise product design at scale: marketing automation, email marketing, operational tooling
- Cross-functional leadership with product, engineering, data, clinical, legal, and executive stakeholders
- AI-fluent practice: Claude Code as primary prototyping tool, plus shipped production AI features
- Design systems: variable-driven component libraries linking design to code, governed for adoption
- UX measurement: research-informed decisions using quantitative and qualitative methods
- Core UX artifacts: user journeys, personas, service blueprints, and journey-stage metrics
- Front-end engineering: React, Next.js, TypeScript, Tailwind CSS, Node.js. Tools: Figma, Claude Code, Adobe Creative Suite, Linear

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Lead end-to-end design and strategy across product, partner enablement, and commercialization for an AI-powered platform serving nearly 1,500 business customers.
- Led the 0-to-1 rebuild of a 20-year-old legacy platform into a modern cross-platform product, strategy through launch in under 6 months, go to market in under 1 year.
- Shaped commercial strategy through design, working across three successive billing models and diagnosing why a free-trial approach failed at the positioning level rather than the interface level.
- Designed the product experience around production AI: an adaptive engine that silently tunes each user's next lesson and difficulty, and an AI voice-cloning system with invite, disclosure, preview, and revocation.
- Built a design system from scratch: several hundred components across mobile and desktop, variable-driven for theming and accessibility flex.
- Established a structured cross-functional operating rhythm across product, engineering, and commercial teams, with weekly reviews and async collaboration to keep a small team moving at speed.
- Designed a behavioral engagement system that lifted user compliance to 38% average and 61% with top partners, against a sub-30% benchmark.
