Summary

Lead product designer with 14 years of product design experience in B2B SaaS and AI products. I lead design for an FDA Class II platform used in nearly 1,500 clinics, where clinicians and older patients with very different levels of data and technology literacy need to see where they stand and what to do next. I've shipped AI features, built a token-driven design system with accessibility in the components, run my own research, mentored designers for about five years, and prototype in code with Claude Code.

Core Strengths

- Turning complex data into clear next steps for users with varying data literacy: progress views, activity views, value models
- AI-powered experiences: when AI should work invisibly and when it needs disclosure and consent, designed for real model output
- Design systems: token-driven components built with engineering, accessibility built in rather than audited after
- Accessibility and inclusive design for older users and sensory impairment; formal WCAG training
- Discovery and research: user interviews, usability tests, and iterating working prototypes with users
- Craft across visual design, interaction design, and functional prototyping in code
- Mentoring and critique: about five years managing designers, researchers, and content designers
- Presenting design strategy and trade-offs to cross-functional partners and senior leadership
- Tools: Figma, Claude Code, Linear. Front end: React, Next.js, TypeScript, Tailwind CSS, Node.js

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Lead design for Lace Pro, an FDA Class II product used in nearly 1,500 audiology clinics: a patient app on iOS, Android, and desktop plus a provider portal where clinicians enroll patients and see who's active. Sole designer until June 2025; now alongside a second product designer.
- Designed a visual training map, streaks, and timed notifications that help patients see their progress and keep going; adherence runs 38% average and 61% at top clinics, against a sub-30% benchmark.
- Designed the experience around an adaptive engine that picks each patient's next lesson and difficulty, made invisible with easy openers and an ease-out at session end.
- Fixed AI avatar encouragement that sounded robotic and repetitive at launch by building a dozen variants; set a process where people write therapy content and AI edits after AI drafts proved factually unreliable.
- Built the design system from scratch: several hundred components across mobile and desktop, with color, type, and sizing driven by tokens so it flexes for accessibility without forking.
- Cut daily training from 20 to 15 minutes by removing interaction points and stops in the flow.
- Designed and built the first working version of a clinic ROI calculator in code, turning a clinic's own numbers into a value case with editable inputs.
- Designed Tinnitus Pro 0-to-1 in under 4 months from audiologist interviews and working prototypes iterated with clinicians. Hearing Technology Innovator Award three years running, 2024 to 2026.

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person team of product designers, researchers, and content designers supporting one of the largest email marketing platforms in the world, coaching through critique and structured feedback.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.
- Influenced product direction through user research, experimentation, and cross-functional partnership with senior stakeholders.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Directed end-to-end product design across platform features that competed directly with, and in most cases outperformed, HubSpot.
- Established story mapping, structured user testing, and design review processes that made ambiguous, data-rich workflow problems tractable.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.
- Mentored designers while carrying my own product areas end-to-end in a lean, agile environment.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform for primary school educators to collaborate and share skills, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
