Summary

Staff-level product designer with 14 years of product design experience on web and mobile, leading work across multiple product areas in B2B SaaS and regulated health. I design dense operational software people work inside all day, set the patterns and design systems other designers build on, and attach measured results to what ships. I use AI at every step, with Claude Code as my main environment, and I've mentored and managed designers for about five years.

Core Strengths

- Leading large, ambiguous initiatives across multiple product areas, from framing through launch and iteration
- Dense operational software for people who work in it all day: CRM, automation builders, clinical workflows
- Interaction and visual systems others build on: token-driven design system, visual languages for complex logic
- Quantified impact: adherence, time on task, clinical outcomes, and business-model experiments
- AI in every step: Claude Code, agent-driven production work, and judgment about where AI output shouldn't ship
- Building in code: functional prototypes and tools in React, Next.js, TypeScript, and Node.js
- Direct customer research: interviews and working prototypes iterated with customers
- Mentoring designers formally and informally; partnering with senior leadership
- Tools: Figma, Claude Code, Linear. Front end: React, Next.js, TypeScript, Tailwind CSS, Node.js

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Lead design across connected products used in nearly 1,500 audiology clinics: a provider portal clinicians use mid-visit, a patient app on iOS, Android, and desktop, and two products (Lace Pro and Tinnitus Pro) sharing one app and one login. Sole designer until June 2025; now working alongside a second product designer.
- Cut daily patient training from 20 to 15 minutes by removing interaction points and stops; adherence runs 38% average and 61% at top clinics, against a sub-30% benchmark.
- Tested three billing models in the provider portal, diagnosing failures that lived outside the interface; clinic-wide licensing took cost out of enrollment.
- Designed Tinnitus Pro 0-to-1 in under 4 months from audiologist interviews and working prototypes iterated with clinicians. First outcomes look: 40% of patients with bothersome tinnitus reached clinically meaningful improvement.
- Built the design system from scratch: several hundred components across mobile and desktop, token-driven for theming and accessibility.
- Built an AI production workflow for a family of about 20 sales case studies: writers deliver copy to a spec and an agent fits it into a coded template I designed; 7 done.
- Built the first working version of the clinic ROI calculator in code before a developer finished it. Hearing Technology Innovator Award three years running, 2024 to 2026.

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person team of product designers, researchers, and content designers on one of the largest email marketing platforms in the world, staying hands-on through critique and structured feedback.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.
- Influenced product direction through user research, experimentation, and cross-functional partnership with senior stakeholders.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Designed the Visual Workflow Builder: a visual language for triggers, filters, actions, and nested workflows that turned form-based automation logic into a readable map, rolled out beside the legacy builder with opt-in, a sunset date, and support-assisted migration.
- Established story mapping, structured user testing, and design review processes that made ambiguous, data-rich workflow problems tractable.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.
- Mentored designers while carrying my own product areas end-to-end in a lean, agile environment.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform supporting educator peer collaboration, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
