Summary

Principal-level product designer with 14 years of product design experience in B2B marketing technology and AI products. I designed SharpSpring's visual workflow builder for marketing automation, led design teams at SharpSpring and Constant Contact, and now design production AI at Neurotone AI for a product used in nearly 1,500 clinics: invisible adaptation, consent and revocation, and generative content. I research with customers, define success measures, and prototype in code with Claude Code.

Core Strengths

- AI experience design: when AI should act invisibly and when it needs disclosure, consent, and control
- Generative AI limits in practice: factually wrong output, repetitive output, and human review and editing
- Workflow automation and builder UX: turning complex rule logic into something customers configure on their own
- B2B marketing technology: marketing automation, CRM, and email marketing for agencies and multi-client teams
- Customer discovery, concept testing, and usability studies; success measures for adoption, task completion, and time on task
- Hands-on prototyping in code: Claude Code, React, Next.js, TypeScript
- Design systems: variable-driven component libraries built for theming and accessibility
- Critique, mentorship, and executive storytelling across distributed product and engineering teams
- Tools: Figma, Claude Code, Linear. Front end: React, Next.js, TypeScript, Tailwind CSS, Node.js

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Design production AI for Lace Pro, an FDA Class II product used in nearly 1,500 audiology clinics, across a patient app on iOS, Android, and desktop and a provider portal. Sole designer until June 2025; now alongside a second product designer.
- Designed the experience around an adaptive engine that picks each patient's next lesson and difficulty on its own, made invisible with easy openers and an ease-out at session end.
- Fixed AI avatar encouragement that sounded robotic and repetitive at launch by building a dozen variants, so it stopped sounding scripted.
- Tested generative AI for therapy lesson content; the output was fluent but factually unreliable, so we set a process where people write the content and AI handles structure and editing.
- Designed a HIPAA and GDPR compliant AI voice-cloning flow: invite, disclosure, preview, and revocation.
- Cut daily training from 20 to 15 minutes by removing interaction points and stops; adherence runs 38% average and 61% at top clinics, against a sub-30% benchmark.
- Designed Tinnitus Pro 0-to-1 in under 4 months from competitive research, audiologist interviews, and working prototypes iterated with clinicians.
- Prototype in code with Claude Code: built the first working version of the clinic ROI calculator and a partner certification platform end to end in Next.js and TypeScript.

Tools: Figma, Adobe Suite, Linear, Claude Code, ChatGPT

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person product design team supporting one of the largest email marketing platforms in the world, coaching through critique and structured feedback while staying hands-on.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.
- Influenced product direction through user research, experimentation, and cross-functional partnership with senior stakeholders.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Designed the Visual Workflow Builder, turning form-based automation rules into a readable decision tree. Customers told support they were building workflows faster and trying automations they never had; it rolled out side by side with opt-in and a sunset date.
- Established story mapping, structured user testing, and design review processes that made ambiguous, data-rich workflow problems tractable.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.
- Mentored designers while carrying my own product areas end-to-end in a lean, agile environment.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform supporting educator peer collaboration, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
