Summary

Principal-level product designer with 14 years of product design experience in B2B SaaS and AI products. I take undefined briefs to shipped product: I lead design for an FDA Class II platform used in nearly 1,500 clinics, including personalized experiences built on an adaptive engine I didn't own, and shipped a second product from scratch in under four months. I prototype in code with Claude Code, use AI agents in production work, hold product and brand to the same craft bar, and build alignment through prototypes and clear narrative.

Core Strengths

- Personalized and adaptive experiences built on infrastructure owned by research and engineering
- Deciding when AI should work invisibly and when it needs disclosure, consent, and control
- Undefined brief to shipped experience: 0-to-1 products, self-directed, often as the only designer
- Systems thinking across surfaces and boundaries: two products in one app and login, patient app and provider portal, business models, migrations
- Prototyping in code as the default artifact: Claude Code, React, Next.js, TypeScript
- AI in production design work: agent-driven content into coded templates, with AI's limits kept in view
- Visual and interaction craft across product and brand: identity, marketing site, print, and product
- Building alignment with product, engineering, and leadership through prototypes and design narrative
- Tools: Figma, Claude Code, Linear. Front end: React, Next.js, TypeScript, Tailwind CSS, Node.js

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Lead design for Lace Pro, an FDA Class II product used in nearly 1,500 audiology clinics: a patient app on iOS, Android, and desktop plus a provider portal. Sole designer until June 2025; now alongside a second product designer. Brand and product are one job here: identity, marketing site, print, and product.
- Designed the experience around an adaptive engine that personalizes each patient's next lesson and difficulty, made invisible with easy openers and an ease-out at session end.
- Designed AI voice cloning, personalized training in a loved one's voice, with explicit disclosure, preview, consent, and revocation under HIPAA and GDPR.
- Fixed AI avatar encouragement that sounded robotic and repetitive at launch by building a dozen variants, so it stopped sounding scripted.
- Built an AI production workflow for a family of about 20 sales case studies: writers deliver copy to a spec and an agent fits it into a coded template I designed; 7 done, with the instructions kept in a Claude project.
- Designed Tinnitus Pro 0-to-1 in under 4 months with no existing product to reference. It shares one app download and one login with Lace Pro, and each patient sees only the products they've bought.
- Tested three billing models in the provider portal, diagnosing failures that lived outside the interface; clinic-wide licensing took cost out of enrollment.
- Prototype in code with Claude Code: built the first working version of the clinic ROI calculator and a partner certification platform end to end in Next.js and TypeScript. Hearing Technology Innovator Award three years running, 2024 to 2026.

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person product design team supporting one of the largest email marketing platforms in the world, coaching through critique and structured feedback while staying hands-on.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.
- Influenced product direction through user research, experimentation, and cross-functional partnership with senior stakeholders.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Designed the Visual Workflow Builder, turning form-based automation logic into a readable decision tree, and rolled it out side by side with the legacy builder: opt-in, a sunset date, and support-assisted migration.
- Established story mapping, structured user testing, and design review processes that made ambiguous, data-rich workflow problems tractable.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.
- Mentored designers while carrying my own product areas end-to-end in a lean, agile environment.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform supporting educator peer collaboration, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
