Summary

Senior product designer with 14 years of product design experience, focused on making clinical software fast and clear for people who didn't choose to be technology users. I own end-to-end design for an FDA Class II platform used in nearly 1,500 clinics: a patient app on mobile and desktop and a portal for providers. I work embedded with engineering, prototype in code, run usability research with clinicians, and built the product's shared design system from scratch.

Core Strengths

- Task-focused workflow design for time-pressed users: fewer steps, clear next actions, measured time savings
- Embedded partnership with engineering in B2B and enterprise products, with prototypes built in React and TypeScript
- Designing for two audiences at once: patient-facing mobile and desktop apps alongside provider and clinic portals
- Notification design across push, SMS, and email, timed to user behavior and drop-off risk
- Reporting and operational views: CRM pipelines and automation reporting, clinic enrollment and patient activity
- Usability research with clinicians and end users: interviews, site shadowing, and testing working prototypes
- Shared Figma libraries and UX standards: variable-driven components built for theming and accessibility
- Regulated healthcare (FDA Class II, HIPAA, GDPR) and accessibility for older adults
- Tools: Figma, Claude Code, Linear. Front end: React, Next.js, TypeScript, Tailwind CSS, Node.js

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · Health AI Platform / FDA Class II

- Own end-to-end design (discovery, flows, prototypes, specs) for an FDA Class II therapeutic used in nearly 1,500 audiology clinics: a patient app on iOS, Android, and desktop plus a provider portal. Sole designer until June 2025; now working alongside a second product designer.
- Cut daily patient training time from 20 to 15 minutes by removing interaction points and stops in the flow, meeting the goal set for a one-month clinical dose.
- Designed enrollment to fit inside a standard clinic visit: the provider enters a name and phone number, the patient gets a text and installs the app in the room, and login is phone number only, with no password.
- Designed the notification system across push, SMS, and email, timed to research-identified drop-off points. With progress mapping and streaks, it lifted adherence to 38% average and 61% at top clinics, against a sub-30% benchmark.
- Built the shared design system from scratch: several hundred components across mobile and desktop, with color, type, and sizing driven by variables so it flexes for accessibility without forking.
- Work embedded with engineering daily and prototype in code: built the first working version of the clinic ROI calculator and a partner certification platform end to end in Next.js and TypeScript.
- Led 0-to-1 design of Lace AI Pro in under 6 months and Tinnitus Pro in under 4 months, testing working prototypes with audiologists throughout. Hearing Technology Innovator Award three years running, 2024 to 2026.

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person product design team supporting one of the largest email marketing platforms in the world, coaching through critique and structured feedback while staying hands-on.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.
- Influenced product direction through user research, experimentation, and cross-functional partnership with senior stakeholders.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Directed end-to-end product design across platform features that competed directly with, and in most cases outperformed, HubSpot.
- Established story mapping, structured user testing, and design review processes that made ambiguous, data-rich workflow problems tractable.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.
- Mentored designers while carrying my own product areas end-to-end, working embedded with engineering in a lean, agile environment.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform supporting educator peer collaboration, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
