Summary

Senior product designer with 14 years of product design experience, designing for clinicians who run their own practices. I lead design for an FDA Class II health platform used in over 1,500 audiology clinics, from the patient at home to the clinician mid-visit to the clinic that pays for it. I own discovery through delivery, design the experience around production AI with accuracy and consent built in, and measure the work against clinical and business outcomes.

Core Strengths

- Clinical workflow design: enrollment and setup that fit inside a standard visit, built from observed practice
- AI experience design with accuracy and consent: reviewed AI-generated clinical content; invite, disclosure, preview, revocation
- Discovery to delivery: competitive research, clinical literature, clinician interviews, working prototypes
- Research methods: formal usability studies, interviews, concept testing, NPS, app store ratings, Clarity, Hotjar, Pendo
- Outcome-driven design: adherence, time on task, and clinical results as the measures of success
- Interaction patterns and visual language: design system from scratch, variable-driven for theming and accessibility
- Regulated products: FDA Class II, HIPAA, GDPR
- Critique and mentorship: ran critique, then managed designers, researchers, and content designers
- Front end: React, Next.js, TypeScript, Tailwind CSS. Tools: Figma, Figma Make, Claude Code, Linear

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · Health AI Platform / FDA Class II

- Lead design for Lace Pro, an FDA Class II therapy used in over 1,500 audiology clinics, mostly small practices: a patient app on iOS, Android, and desktop, a provider portal, and the clinic business case. Sole designer until June 2025; now alongside a second product designer.
- Designed enrollment to fit inside a standard clinic visit: the provider enters a name and phone number and the patient installs the app in the room, with password-free login for older patients.
- Shaped commercial strategy through design: tested three billing models and landed on one that lets providers prescribe unlimited access without patient billing concerns during the exam.
- Cut daily training from 20 to 15 minutes by removing interaction points and stops in the flow; designed a behavioral engagement system that lifted adherence to our training to 38% average and 61% at top clinics, against a sub-30% benchmark.
- Designed the product experience around production AI: an adaptive engine that silently tunes each patient's next lesson, and a HIPAA and GDPR compliant voice-cloning system with invite, disclosure, preview, and revocation. Reviewed and corrected AI-generated lesson content for tone and accuracy.
- Designed Tinnitus Pro 0-to-1 in under 4 months from competitive research, clinical literature, and audiologist interviews, iterating working prototypes with clinicians; 40% of bothersome-tinnitus patients reached clinically meaningful improvement in the first look.
- Built a design system from scratch: several hundred components across mobile and desktop, variable-driven for theming and accessibility. Hearing Technology Innovator Award three years running, 2024 to 2026.

Product Design Manager

Constant Contact · Oct 2021 – Apr 2024 · Enterprise SaaS / Email Marketing Platform

- Led and mentored a 5-person team of product designers, researchers, and content designers supporting one of the largest email marketing platforms in the world, running critique and structured feedback.
- Designed against daily active usage as a tracked metric, combining research and product data to choose which problems to solve.
- Directed end-to-end UX strategy across roadmap initiatives, aligning product, engineering, and business objectives.
- Facilitated iterative co-design, weekly reviews, and async collaboration across a distributed team.

Head of User Experience · Senior UX Designer · UX Designer

SharpSpring, Inc. · Dec 2014 – Oct 2021 · B2B SaaS / Marketing Automation

- Principal designer on a 4-person UX team, designing the operational workflows (CRM, pipelines, automation builders, reporting) that agencies and SMBs ran their businesses on.
- Ran formal usability studies with user testing, and established story mapping and design review processes for complex, data-rich workflows.
- Designed the Visual Workflow Builder, rolled out beside the legacy builder with opt-in, a sunset date, and support-assisted migration.
- Ran design critique before holding the title, then managed and hired designers; brought in an intern who now leads growth design at Noom.
- Championed a unified design system linking visual components to coded equivalents, improving scalability and development velocity.

Tools: Figma, Zeplin, Jira, Monday.com, Hotjar, Pendo, Storybook

UX Consultant, Freelance

Fyllo Compliance Cloud · Feb 2021 – Sep 2021 · B2B Compliance SaaS

- Delivered a UX audit, structured component inventory, and scalable design system components for a B2B compliance platform operating under strict regulatory constraints.

UI/UX Expert

University of Florida, College of Education · Aug 2012 – Dec 2014

- Designed and built a 0-to-1 web platform supporting educator peer collaboration, owning UX strategy and front-end development.

Internet Services Director

Group Five + Associates · Aug 2009 – Aug 2012 · Agency, Gainesville, FL

- Agency work across multiple client accounts and industries, spanning brand identity, web design, and print, with the context-switching that multi-client environments demand.

Education & Certification

Bachelor of Fine Arts · Millersville University, Millersville, PA

SharpSpring Platinum Partner Certification

Google web.dev Learn Accessibility (WCAG, ARIA, inclusive design) · 2026
