Summary

Player-coach product designer with 14 years of product design experience, seven of them on marketing automation for agencies, where I designed campaign reports, sales pipeline reports, and the lead record. I've built design functions from scratch: critique, career ladders, job descriptions, onboarding, and design systems. Today I'm the hands-on lead designer on an FDA Class II product, with AI in every step of my work.

Experience

Lead Product Designer

Neurotone AI (Lace AI Pro & Tinnitus Pro) · Apr 2024 – Present · SaaS / AI Platform

- Lead design for Lace Pro, an FDA Class II product in nearly 1,500 audiology clinics: a patient app on iOS, Android, and desktop and a provider portal. Sole designer until June 2025; now alongside a second product designer.
- Designed and built the first working clinic ROI calculator in code with Claude, turning a clinic's own numbers into a story a sales rep could walk through; handed to a developer for production.
- Cut daily training from 20 to 15 minutes by removing interaction points and stops; adherence to our training runs 38% average and 61% at top clinics, against a sub-30% benchmark.
- Built the design system from scratch: several hundred components across mobile and desktop, variable-driven for per-clinic themes, each meeting WCAG AAA contrast.
- Built an AI production workflow for sales case studies: writers deliver copy to a spec and an agent fits it into a coded template, with rules packaged in a Claude project teammates can run.
- Designed Tinnitus Pro 0-to-1 in under 4 months from audiologist interviews and working prototypes iterated with clinicians.
